Legal Document Summarization

Sample Contract Summaries — Fine-Tuned BART Model

The 5 summaries below were generated by the fine-tuned BART model using this project's hierarchical chunk-summarize-then-combine pipeline: each contract was split into ~380-word, sentence-aligned chunks, each chunk was summarized independently, and the chunk-level summaries were combined into a single document-level summary. Contracts are drawn from the CUAD dataset and span a range of original lengths (109 to 17,703 words) to illustrate performance on both short and long documents.
